

Energy Efficiency Alberta is a new Government of Alberta agency responsible for helping Albertans reduce their energy consumption and improve their energy efficiency at home and work, reducing greenhouse gas emissions in the province.

The Agency is a provider of energy efficiency, conservation and small-scale renewable energy solutions. It exists to help families, businesses and other organizations improve their homes and facilities while using less energy and reducing their carbon footprint. This saves money, contributes to a cleaner environment and creates jobs and helps diversify the economy.

## Who We Are

---

Energy Efficiency Alberta was established in January 2017 as one component of Alberta's Climate Leadership Plan. CEO Monica Curtis began work in April 2017, and since then has built a team of 37 agency staff that designs and delivers energy efficiency and renewable energy programs in the province. Energy Efficiency Alberta is headed by a diverse board with expertise in energy efficiency, governance and community building. More than 350 implementation partners work directly with Energy Efficiency Alberta to deliver energy efficiency solutions in Alberta homes, businesses and organizations. Eleven hundred home improvement companies and 200 retailers indirectly support Energy Efficiency Alberta by providing and installing energy-efficient products and technologies.

## Our Mandate

---

The mandate of Energy Efficiency Alberta is:

1. To raise awareness about energy use and the associated economic and environmental consequences.
2. To promote, design and deliver programs related to energy efficiency, energy conservation and the development of micro-generation and small-scale renewable energy systems in Alberta.
3. To promote the development of an energy efficiency services industry.
