

# INSTANT SAVINGS PROGRAM

## WHAT IS IT?

Our Instant Savings Program offers just that—instant savings on qualified energy-efficient products purchased at participating retailers across Alberta during campaigns in spring and fall.

## ELIGIBLE PRODUCTS

- Water saving devices such as kitchen aerators and low-flow shower heads
- LED lights
- Lighting fixtures and controls such as dimmers, heavy-duty timers and motion sensors
- Outdoor clotheslines
- Smart power strips
- Programmable thermostats

## HOW TO PARTICIPATE?

- Watch the Energy Efficiency Alberta website ([efficiencyalberta.ca](http://efficiencyalberta.ca)) for the next campaign
- When we have an active campaign, check for participating retailers near you using our online search tool ([efficiencyalberta.ca/instant-savings](http://efficiencyalberta.ca/instant-savings))
- Select eligible products at your next in-store visit
- Save right at the till

## KEY BENEFITS

Eligible products in this program help to reduce energy use in your home, which helps to reduce your utility bills.

Low flow shower heads save 40% more water while enhancing pressure and performance.

Timers and motion sensors help make sure you're not wasting energy lighting empty and unused rooms.

## DID YOU KNOW?

In many homes, clothes dryers are actually the highest power consumers, using more energy annually than a new fridge, making air-drying an important option.

Space heating and cooling represent almost two thirds of your home energy use, making temperature control an important place to save.

## WHO CAN PARTICIPATE?

All Albertans can participate at any of our more than 600 retailers in over 225 communities across the province. Our online tool at [efficiencyalberta.ca/instant-savings](http://efficiencyalberta.ca/instant-savings) makes it easy for you to find a participating store.
